

VCI2000

VCI-121 Emitters also for ESD safe usage.
Compact, Clean, Easy to Install.
Effective to Use.

Compact Ø60x24mm

Product Description

VCI2000 emitters are designed to prevent corrosion on metals inside cabinets and enclosures where ESD properties are also needed. The protective vapors begin to work immediately upon installation and will last for up to 2 years. This emitter can serve in a clean environment.

Use as many as you need for the size of the cabinet, crate or box.

Corrosion Protection

Protects up to **230 liters** (8.0 cu.ft) for up to 24 months.
 Effective on steel, copper, zinc and multi-metal parts.

Applications

Electronics equipment, telecommunication equipment, control panels, marine equipment, containers, shipping crates, military equipment and more.

Typical Properties

Dimensions: 3 5/16" x 8 3/16" x 1/8" (84mm x 210mm x 3mm).

Color: Green

Surface Resistivity ----- < 10¹² Ohms/sq. ASTM D 257

Static decay rate ----- 0.7 sec 5000-0 volts EIA 541

Triboelectric charge ----- 0.12 sq.inch EIA 541

Storage: Do not store above 55°C (130° F)
